NARISWARI NUR SHABRINA

Bandung, Indonesia 089517808068 nariswari26@gmail.com
Nariswari N.S shabrinann__

PROFILE SUMMARY

Informatics Engineering graduate with a specialization in Artificial Intelligence (AI), Machine Learning, Deep Learning, and Natural Language Processing (NLP). Experienced in developing AI-based solutions, preparing technical documentation, and conducting scientific research and publications. Skilled in data analysis, systematic problem-solving, and effectively communicating complex technical concepts to diverse audiences.

EDUCATION

Jenderal Achmad Yani University **September 2021 - September 2025**
Cimahi - Bandung
Bachelor's Degree in Informatics Engineering
GPA : 3.56

- Specialized in Artificial Intelligence, with a focus on Machine Learning, Deep Learning, and Natural Language Processing.
- Team Leader of the 2024 Student Creativity Program for Exact Science Research (PKM-RE), focusing on Brain-Computer Interface Using Wavelet Transform and UNETER.
- Team Leader of the 2025 Student Creativity Program for Exact Science Research (PKM-RE), focusing on Speech Emotion Recognition in Indonesian Conversations Using Bidirectional Long Short-Term Memory (BiLSTM).

WORK AND INTERNSHIP EXPERIENCE

PT LAPI ITB **August 2026 - Present**
Programming

- Contributed to software development activities through programming implementation, system testing, and technical problem-solving.
- Improved programming skills through hands-on experience in developing and maintaining technology-based solutions.
- Collaborated with project teams to analyze requirements and implement effective programming solutions.

NAKA **June 2025 - February 2026**
Content Planner

- Developed content plans and content calendars for social media platforms aligned with brand strategies.
- Collaborated with the design team in planning and developing engaging content.
- Monitored content performance and provided recommendations for improving content strategies.

Jenderal Achmad Yani University **April 2025 - November 2025**
Research Assistant

- Supported research activities through data processing and analysis.
- Developed and implemented algorithms to support research requirements.
- Prepared technical documentation, research reports, and scientific publications.

Jenderal Achmad Yani University **March 2025 - July 2025**
Laboratory Assistant

- Assisted in the preparation of laboratory sessions and learning materials.
- Guided students during practical sessions and supported the use of software tools.
- Evaluated practical reports and coordinated with lecturers during the assessment process

Regional Disaster Management Agency of Cimahi City (BPBD) **July 2024 - November 2024**
Web Development

- Developed and optimized a disaster information portal to improve public access to emergency-related information.
- Supported the implementation of a chatbot feature to facilitate information delivery and emergency response services.
- Contributed to interface design and enhanced user experience (UX) improvements for the website.

Skilvul X Kampus Merdeka **February 2024 - September 2024**
AI & Cybersecurity Independent Study Participant

- Developed a Machine Learning-based credit card fraud detection system.
- Built a handwriting extraction solution for document digitization.
- Applied concepts of Artificial Intelligence, Cybersecurity, and Data Analysis to address industry-based case studies.

Hacktiv8 X Kampus Merdeka **August 2023 - January 2024**
UI/UX Design Independent Study Participant

- Designed user interface prototypes using Figma based on user requirements.
- Conducted usability testing to evaluate the effectiveness and usability of the designs.
- Improved design solutions based on evaluation results and user feedback.

Indonesia's Corruption Eradication Commission(KPK) **November 2023**
Administrative Verifier

- Verified CPNS candidate documents in accordance with applicable administrative requirements.
- Ensured data accuracy and document completeness throughout the verification process.
- Identified and minimized data discrepancies to support a smooth selection process.

PROJECT

Speech Emotion Recognition for Indonesian Language Conversations Using Bidirectional Long Short-Term Memory (BiLSTM)
Team Leader of the 2025 Student Creativity Program for Exact Science Research (PKM-RE)
Passed the University-Level Selection

- Led a team in developing a Deep Learning model for emotion recognition in Indonesian conversations.
- Performed audio data processing and developed models using the BiLSTM architecture.
- Prepared research proposals, coordinated project implementation, and compiled research progress reports.

Brain-Computer Interface Using Wavelet Transform and UNETR

Team Leader of the 2024 Student Creativity Program for Exact Science Research (PKM-RE)
Passed the University-Level Selection

- Led a research project on the development of an EEG signal-based Brain-Computer Interface (BCI).
- Applied Wavelet Transform and U-NET with Transformer (UNETR) architecture for signal data analysis and processing.
- Prepared research proposals, coordinated project implementation, and compiled research progress reports.

Credit Card Fraud Detection System

Skilvul x Kampus Merdeka | Artificial Intelligence & Cybersecurity

- Developed a Machine Learning model to detect potentially fraudulent credit card transactions.
- Performed data preprocessing, exploratory data analysis, and classification model performance evaluation.
- Applied Python and Convolutional Neural Network (CNN) techniques to develop fraud detection solutions.

Handwritten Extraction System

Skilvul x Kampus Merdeka | Artificial Intelligence & Cybersecurity

- Developed a handwriting extraction system to support document digitization processes.
- Applied Image Processing and Optical Character Recognition (OCR) techniques to identify information from handwritten documents.
- Processed and extracted data automatically to improve document management efficiency.

PUBLICATION

A BiLSTM-Based Approach For Speech Emotion Recognition In Conversational Indonesian Audio using SMOTE

Jurnal Teknik Informatika (JUTIF), Universitas Jenderal Soedirman
Published in 2025

DOI/Link: https://jutif.if.unsoed.ac.id/index.php/jurnal/article/view/5183

ACHIEVEMENTS

- Top 10 AI & Cybersecurity Project (Finance & Banking Category)
- Team Leader of PKM-RE 2024 – Research proposal titled "Brain-Computer Interface Using Wavelet Transform and UNETR" selected at the university level.
- Team Leader of PKM-RE 2025 – Research proposal titled "Speech Emotion Recognition in Indonesian Conversations Using BiLSTM" selected at the university level.

SKILLS

- Languages: Indonesian, English.
- Tools & Platforms: Visual Studio Code, Google Colab, Jupyter Notebook, JarvisLabs, VMware, TeamViewer, GitHub, Figma, Canva, Procreate, Maltego.
- Documentation & Productivity Tools: Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Microsoft Outlook, Google Docs, OneNote, Mendeley.

ORGANIZATIONAL EXPERIENCE

Community Service Department | HM KM J IF **January 2024 - March 2025**
Head of Department

- Led the planning and implementation of technology-based community service programs.
- Coordinated with various stakeholders to ensure the successful execution of departmental programs.
- Managed and guided team members in carrying out department activities.

Department of Strategic Studies and Advocacy | HM KM J IF **February 2022 - December 2023**
Staff

- Participated in strategic studies and analysis of student-related issues.
- Supported the implementation of advocacy programs and organizational activities.
- Contributed to the development of recommendations and departmental work programs.

University-Level Introduction to Campus Life for New Students **September 2022**
Mentor

- Mentored new students throughout the orientation process and supported their adaptation to both academic and non-academic environments.
- Provided guidance and information regarding campus activities, academic matters, and student life.
- Served as a liaison between participants and the organizing committee to ensure the smooth execution of activities.

University-Level Introduction to Campus Life for New Students **September 2023**
Disciplinary Committee

- Monitored program activities to ensure participants complied with established rules and regulations.
- Assisted in maintaining order and ensuring the smooth execution of the new student orientation program.
- Ensured that all activities were conducted in accordance with predefined guidelines and procedures.

Informatics Department New Student Orientation Program **September 2022**
Secretary

- Managed event administration and documentation to support the smooth execution of the program.
- Coordinated with the organizing committee in preparing activity documents and administrative requirements.
- Prepared and archived program documents for reporting and evaluation purposes.

Informatics Department New Student Orientation Program **September 2023**
Disciplinary Committee

- Developed rules and regulations as guidelines for program implementation.
- Monitored compliance with established regulations to ensure activities were conducted according to applicable standards.
- Collaborated with the organizing committee to maintain discipline and resolve participant-related issues during the program.
